Ready To Elevate Your Business With Ai?

Transform your business operations with AI-powered Autonomous Agents from CRMIT, built on Salesforce's Agentforce platform. Our agents act intelligently to streamline processes, enhance customer engagement, and boost efficiency.

aimplifAI Innovating Tomorrow, One, Autonomous Agent At A Time

■ **PropelAI**

Our AI-powered Copilot enables Sales reps and Marketers to create personalized, data-driven value propositions in real-time, leveraging customer insights for impactful proposals. Enhance productivity, engage customers precisely, and achieve better results with reduced manual effort.

■ **Sales Coach**

Boost your sales team's efficiency with an AI-driven Decision Support Agent, providing real-time insights to discover, qualify, and close opportunities faster. Enhance productivity & accelerate success with tailored support throughout the sales cycle.

■ **Call Analyzer**

The Call Analyzer Agent delivers real-time insights from customer calls, boosting sales effectiveness by identifying participants, distinguishing clients from agents, and extracting key insights for faster follow-ups and deal closures.

■ **Case InsAights**

This support agent gives service managers a detailed case summary with task progress, emails, and insights, helping them quickly identify issues and take informed corrective actions.

■ **HC360 Symptom Checker**

This agent aids healthcare professionals by gathering & analyzing patient-reported symptoms, cross-referencing them with medical databases to identify potential conditions. It prioritizes cases based on symptom severity, enabling faster and more accurate pre-diagnoses.

■ **Triaging & Appointment Scheduling Agent**

This agent triages symptoms to match patients with the most suitable specialist based on medical needs, specialization, and proximity, ensuring quick and convenient access to appropriate care.

■ **Pathological AI Agent**

It analyzes lab results and medical data flagging potential issues, comparisons. These AI-powered agents don't just deflect support cases.

■ **Resume Parsing Agent**

This agent scans resumes, extracts key skills, experience, and qualifications, scores candidates based on set criteria, and supports TA teams in fast-tracking profile screening and interview prioritization.
